Tracy Baker
SBDC Regional Director

Miles City Regional SBDC

Driven Repair, LLC

"With the SBDC's help I was able to purchase the land and property that I was leasing and grow my business!"
Gregg Clark, Owner

Gregg Clark, owner of driven repair had been operating his diesel truck repair business from a leased facility since early 2016. In late 2017 he was approached with the opportunity to buy the building and property located outside of Miles City.

Gregg turned to the Miles City SBDC for assistance. The SBDC provided guidance on the business planning process, market research, financial projections, and loan packaging. With the assistance of the Miles City SBDC, the loan process was successfully accelerated allowing Driven Repair to receive the requested funding.

In 2018, Gregg was able to take advantage of the opportunity and finalize the purchase. The financing also allowed Gregg to fix drainage issues on the property and make general repairs to the building. Gregg has added a full-time mechanic that is well versed in both truck and agriculture equipment maintenance and repair. The improvement to the property along with the additional technician allows Driven Repair to meet the demand for diesel truck repair services in Miles City and the surrounding area.
